

Notice of Study Commencement and Public Information Centre 1

Utilities Kingston Water and Wastewater Master Plan and Pollution Prevention and Control Plan

The Study

Utilities Kingston is undertaking a new update to their Water and Wastewater Master Plan (WWMP) and Pollution Prevention and Control Plan (PPCP) to account for future needs to 2051. The City of Kingston is expecting significant population growth over the planning horizon which has triggered the need for a combination of densification, infill, and urban boundary expansion(s). The new WWMP and PPCP will provide guidance for new and replacement infrastructure to meet existing and future needs. The study will be carried out in accordance with the Municipal Engineers Association's (MEA) process for Municipal Class Environmental Assessment (MCEA) Approach 1 Master Plans. The study area can be seen in Figure 1.

The Study Process

The study will be carried out as a master plan in accordance with the MEA's MCEA Process (MEA 2024), which is an approved process under the Ontario *Environmental Assessment Act*. The study will follow MCEA Approach 1 for completing a master plan, which involves the preparation of the WWMP at the end of phases 1 and 2 of the MCEA process. Results from this study will be documented in a master plan report that will be made available for public review.

Opportunities for Participation

Consultation with interested parties, including the public, is an important part of the MCEA study process to identify areas of interest and concern. Two public meetings (public information centres) are planned during the study process to connect with the project team, learn about the study, and facilitate feedback.

Join us for Public Information Centre 1 located at 1550 Princess St., Kingston, ON, in the Doubletree Ambassador Ballroom on October 22, 2025, from 6:00 to 8:00 pm. This PIC will be held in conjunction with an Open House for the City of Kingston's Official Plan and Integrated Mobility Plan Projects.
